Europe Energy Saving Notice

Energy Saving Matters (EuP 2009/125/EC)

Saving electric energy is a key to help protecting the environment. Please turn off all electrical products when they are not in use. To avoid power consumption in idle mode, disconnect all electrical equipment from power when not in use. Thank you!

DOCUMENT VERSION

Due to additional product features and/or enhancements, an updated version of this document may be available online.

Please check www.adj.com for the latest revision/update of this manual before beginning installation and/or programming.

GENERAL INFORMATION

INTRODUCTION

Please read and understand the instructions in this manual carefully and thoroughly before attempting to operate this device. These instructions contain important safety and use information.

This product is intended for use by professionally trained personnel only, and is not suitable for private use.

Unpacking

Every device has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton is damaged, carefully inspect the device for damage, and be sure all accessories necessary to install and operate the device have arrived intact. In the event damage has been found or parts are missing, please contact our customer support team for further instructions. Please do not return this device to your dealer without first contacting customer support. Please do not discard the shipping carton in the trash. Please recycle whenever possible.

BOX CONTENTS

Omega Brackets
1.83M locking power cable

CUSTOMER SUPPORT

Contact ADJ Service for any product related service and support needs. Also visit forums.adj.com with questions, comments or suggestions.

ADJ SERVICE USA - Monday - Friday 8:00am to 4:30pm PST
323-582-2650 | Fax: 323-832-2941 | support@adj.com

ADJ SERVICE EUROPE - Monday - Friday 08:30 to 17:00 CET

IMPORTANT NOTICE!

THERE ARE NO USER SERVICEABLE PARTS INSIDE THIS UNIT. DO NOT ATTEMPT ANY REPAIRS YOURSELF; DOING SO WILL VOID YOUR MANUFACTURER'S WARRANTY. DAMAGES RESULTING FROM MODIFICATIONS TO THIS FIXTURE AND/OR THE DISREGARD OF SAFETY INSTRUCTIONS AND GUIDELINES IN THIS MANUAL VOID THE MANUFACTURER'S WARRANTY AND ARE NOT SUBJECT TO WARRANTY CLAIMS AND/OR REPAIRS.

LIMITED WARRANTY (USA ONLY)

- A. ADJ Products, LLC hereby warrants, to the original purchaser, ADJ Products, LLC products to be free of manufacturing defects in material and workmanship for a prescribed period from the date of purchase (see specific warranty period on reverse). This warranty shall be valid only if the product is purchased within the United States of America, including possessions and territories. It is the owner's responsibility to establish the date and place of purchase by acceptable evidence, at the time service is sought.
- B. For warranty service, you must obtain a Return Authorization number (RA#) before sending back the product-please contact ADJ Products, LLC Service Department at 800-322-6337. Send the product only to the ADJ Products, LLC factory. All shipping charges must be pre-paid. If the requested repairs or service (including parts replacement) are within the terms of this warranty, ADJ Products, LLC will pay return shipping charges only to a designated point within the United States. If the entire instrument is sent, it must be shipped in its original package. No accessories should be shipped with the product. If any accessories are shipped with the product, ADJ Products, LLC shall have no liability whatsoever for loss of or damage to any such accessories, or for the safe return thereof.
- C. This warranty is void if the serial number has been altered or removed; if the product is modified in any manner which ADJ Products, LLC concludes, after inspection, affects the reliability of the product, if the product has been repaired or service by anyone other than ADJ Products, LLC factory unless prior written authorization was issued to purchaser by ADJ Products, LLC; if the product is damaged because not properly maintained as set forth in the instruction manual.
- D. This is not a service contract, and this warranty does not include maintenance, cleaning or periodic check up. During the period specified above, ADJ Products, LLC will replace defective parts at its expense with new or refurbished parts, and will absorb all expenses for warranty service and repair labor by reason of defects in material or workmanship. The sole responsibility of ADJ Products, LLC under this warranty shall be limited to the repair of the product, or replacement thereof, including parts, at the sole discretion of ADJ Products, LLC. All products covered by this warranty were manufactured after August 15, 2012, and bear identifying marks to that effect.
- E. ADJ Products, LLC reserves the right to make changes in design and/or improvements upon its products without any obligation to include these changes in any products theretofore manufactured.
- F. No warranty, whether expressed or implied, is given or made with respect to any accessory supplied with products described above. Except to the extent prohibited by applicable law, all implied warranties made by ADJ Products, LLC in connection with this product, including warranties of merchantability or fitness, are limited in duration to the warranty period set forth above. And no warranties, whether expressed or implied, including warranties of merchantability or fitness, shall apply to this product after said period has expired. The consumer's and/or Dealer's sole remedy shall be such repair or replacement as is expressly provided above; and under no circumstances shall ADJ Products, LLC be liable for any loss or damage, direct or consequential, arising out of the use of, or inability to use, this product.
- G. This warranty is the only written warranty applicable to ADJ Products, LLC Products and supersedes all prior warranties and written descriptions of warranty terms and conditions heretofore published.

LIMITED WARRANTY PERIODS

- **Non L.E.D. Lighting Products = 1-year (365 days) Limited Warranty** (Such as: Special Effect Lighting, Intelligent Lighting, UV lighting, Strobes, Fog Machines, Bubble Machines, Mirror Balls, Par Cans, Trussing, Lighting Stands etc. excluding LED and lamps)
- **Laser Products = 1 Year (365 Days) Limited Warranty** (excludes laser diodes which have 6 month limited warranty)
- **L.E.D. Products = 2-year (730 days) Limited Warranty** (excluding batteries which have a 180 day limited warranty)
Note: 2 Year Warranty only applies to purchases within the United States.
- **StarTec Series = 1 Year Limited Warranty** (excluding batteries which have a 180 day limited warranty)
- **ADJ DMX Controllers = 2 Year (730 Days) Limited Warranty**

SAFETY GUIDELINES

This device is a sophisticated piece of electronic equipment. To guarantee a smooth operation, it is important to follow all instructions and guidelines in this manual. ADJ PRODUCTS, LLC. is not responsible for injury and/or damages resulting from the misuse of this device due to the disregard of the information printed in this manual. Only the original included parts and/or accessories for this device should be used. Any modifications to the device, included and/or accessories will void the original manufactures warranty and increase the risk of damage and/or personal injury.

PROTECTION CLASS 1 - FIXTURE MUST BE PROPERLY GROUNDED

**THERE ARE NO USER SERVICEABLE PARTS INSIDE THIS UNIT.
DONOT ATTEMPT ANY REPAIRS YOURSELF; DOING SO WILL VOID YOUR MANUFACTURER'S WARRANTY. DAMAGES RESULTING FROM MODIFICATIONS TO THIS FIXTURE AND/OR THE DISREGARD OF SAFETY INSTRUCTIONS AND GUIDELINES IN THIS MANUAL VOID THE MANUFACTURE'S WARRANTY AND ARE NOT SUBJECT TO ANY WARRANTY CLAIMS AND/OR REPAIRS.**

**DO NOT PLUG FIXTURE INTO A DIMMER PACK!
NEVER OPEN THIS FIXTURE WHILE IN USE!
UNPLUG POWER BEFORE SERVICING FIXTURE!
NEVER TOUCH FIXTURE DURING OPERATION, AS IT MAY BE HOT!
KEEP FLAMMABLE MATERIALS AWAY FROM FIXTURE!**

**NEVER LOOK DIRECTLY INTO THE LIGHT SOURCE!
RETINA INJURY RISK - MAY INDUCE BLINDNESS!
SENSITIVE PERSONS MAY SUFFER AN EPILEPTIC SHOCK!**

**INDOOR / DRY LOCATIONS USE ONLY!
DO NOT EXPOSE FIXTURE TO RAIN AND MOISTURE!**

**MINIMUM DISTANCE TO OBJECTS SURFACES MUST BE 4.9 FEET (1.5 METERS)
MAXIMUM TEMP OF EXTERNAL SURFACE 185°F (85°C)
MINIMUM DISTANCE OF INFLAMMABLE MATERIALS
FROM THE SURFACE .7 FEET (0.2 METERS)**

SAFETY GUIDELINES

DO NOT TOUCH the fixture housing during operation. Turn OFF the power and allow approximately 15-minutes for the fixture to cool down before serving.

DO NOT shake fixture, avoid brute force when installing and/or operating fixture.

DO NOT operate fixture if the power cord is frayed, crimped, damaged and/or if any of the power cord connectors are damaged and do not insert into the fixture securely with ease. NEVER force a power cord connector into the fixture. If the power cord or any of its connectors are damaged, replace it immediately with a new one of similar power rating.

DO NOT block any air ventilation slots.

All fan and air inlets must remain clean and never blocked.

Allow approx. 7.9" (20cm) between fixture and other devices or a wall for proper cooling.

When installing fixture in a suspended environment, always use mounting hardware that is no less than M10 x 25 mm, and always install fixture with an appropriately rated safety cable.

Always disconnect fixture from main power source before performing any type of service and/or cleaning procedure. Only handle the power cord by the plug end, never pull out the plug by tugging the wire portion of the cord.

During the initial operation of this fixture, a light smoke or smell may emit from the interior of the fixture. This is a normal process and is caused by excess paint in the interior of the casing burning off from the heat associated with the lamp and will decrease gradually over time.

Consistent operational breaks will ensure fixture will function properly for many years.

ONLY Use original packaging and materials to transport the fixture in for service.

SAFETY GUIDELINES

POTENTIAL INTERNAL FIXTURE DAMAGE FROM EXTERNAL SOURCES OF LIGHT BEAMS

External sources of light beams from direct sunlight, lighting moving head fixtures, and lasers, which are focused directly towards the exterior housing and/or penetrate the front lens opening of ADJ lighting fixtures, can cause severe internal damage including burning to optics, dichroic color filters, glass and metal gobos, prisms, animation wheels, frost filters, iris, shutters, motors, belts, wiring, discharge lamps, and LEDs.

This issue is not specific to ADJ lighting fixtures, it is a common issue with lighting fixtures from all manufacturers. Although there is no true way to fully prevent this issue from happening, the following guidelines can prevent any potential damage from occurring if followed. Contact ADJ Service for more details.

DO NOT EXPOSE THE FIXTURE AND/OR FRONT LENS OPENING TO LIGHT BEAMS FROM DIRECT SUNLIGHT, OTHER LIGHTING MOVING HEAD FIXTURES, AND LASERS WHILE UNPACKING, INSTALLATION, USE, AND EXTENDED IDLE TIMES OUTDOORS. DO NOT FOCUS A LIGHT BEAM FROM ONE LIGHTING FIXTURE DIRECTLY TOWARDS ANOTHER.

MAINTENANCE GUIDELINES

DISCONNECT POWER BEFORE PERFORMING ANY MAINTENANCE!

CLEANING

Frequent cleaning is recommended to ensure proper function, optimized light output, and an extended life. The frequency of cleaning depends on the environment in which the fixture operates: damp, smoky, or particularly dirty environments can cause greater accumulation of dirt on the fixture's optics. Clean the external lens surface periodically with a soft cloth to avoid dirt/debris accumulation.

NEVER use alcohol, solvents, or ammonia-based cleaners.

MAINTENANCE

Regular inspections are recommended to ensure proper function and extended life.

There are no user serviceable parts inside this fixture, please refer all other service issues to an authorized ADJ service technician. Should you need any spare parts, please order genuine parts from your local ADJ dealer.

Please refer to the following points during routine inspections:

- A detailed electrical check by an approved electrical engineer every three months, to make sure the circuit contacts are in good condition in order to prevent overheating.
- Be sure all screws and fasteners are securely tightened at all times. Loose screws may fall out during normal operation, resulting in damage or injury as larger parts could fall.
- Check for any deformations on the housing, color lenses, rigging hardware, and rigging points (ceiling, suspension, trussing). Deformations in the housing could allow for dust or liquids to enter into the fixture. Damaged rigging points or unsecured rigging could cause fixture to fall and seriously injure a person(s).
- Electric power supply cables must not show any damage, material fatigue, or sediments.
- **NEVER** remove the ground prong from the power cable.

FIXTURE DISASSEMBLY

The following points should be observed after performing any maintenance procedure that requires disassembly of the unit:

- After the unit has been reassembled, open the valve, and allow the light to run for approximately 2 hours to dry out any moisture that has been trapped inside the fixture. The process should continue until indicated humidity drops below 15% for the head and 30% for the base.
- Once this has been achieved, the light can be switched off, but the unit should remain connected to power so that the cooling fan can cool down the unit. Please note that allowing cool down time should **ALWAYS** be done after lamp operation.
- Some units may require partial disassembly in order to gain access to the valve. Please contact Elation service for information regarding the location and access procedure for the valve on your specific unit model.

INSTALLATION GUIDELINES

FLAMMABLE MATERIAL WARNING

Keep fixture minimum 0.7 feet (0.2m) away from flammable materials and/or pyrotechnics.

ELECTRICAL CONNECTIONS

A qualified electrician should be used for all electrical connections and/or installations.

USE CAUTION WHEN POWER LINKING OTHER MODEL FIXTURES AS THE POWER CONSUMPTION OF OTHER MODEL FIXTURES MAY EXCEED THE MAX POWER OUTPUT ON THIS FIXTURE. CHECK SILK SCREEN FOR MAX AMPS.

**MINIMUM DISTANCE TO OBJECTS/SURFACES
MUST BE 4.9 FEET (1.5 METERS)**

**MINIMUM DISTANCE OF INFLAMMABLE MATERIALS
FROM THE SURFACE 0.7 FEET (0.2 METER)**

MAXIMUM TEMPERATURE OF EXTERNAL SURFACE 185° F (85°C)

DO NOT INSTALL THE FIXTURE IF YOU ARE NOT QUALIFIED TO DO SO!

Fixture **MUST** be installed following all local, national, and country commercial electrical and construction codes and regulations.

Before rigging/mounting a single fixture or multiple fixtures to any metal truss/structure or placing the fixture(s) on any surface, a professional equipment installer **MUST** be consulted to determine if the metal truss/structure or surface is properly certified to safely hold the combined weight of the fixture(s), clamps, cables, and accessories.

Fixture ambient operating temperature range is **0° to 104°F. (0° to 40°C)**.

Do not Use fixture under or above this temperature.

Fixture(s) should be installed in areas outside walking paths, seating areas, or away from areas where unauthorized personnel might reach the fixture by hand.

NEVER stand directly below the fixture(s) when rigging, removing or servicing.

Overhead fixture installation must always be secured with a secondary safety attachment, such as an appropriately rated safety cable.

Allow approximately 15 minutes for the fixture to cool down before servicing.

RIGGING

Overhead rigging requires extensive experience, including among others calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the fixture. If you lack these qualifications, do not attempt the installation yourself. Improper installation can result in bodily injury.

ALWAYS ATTACH AN APPROPRIATELY RATED SAFETY CABLE (NOT INCLUDED) THAT MEETS ALL LOCAL, NATIONAL, AND COUNTRY CODES AND REGULATIONS WHENEVER INSTALLING FIXTURE IN A SUSPENDED ENVIRONMENT!

INSTALLATION GUIDELINES

OMEGA BRACKETS INSTALLATION

Insert the Omega Brackets into the matching holes on the bottom of the fixture. Secure the Omega Brackets to the fixture by turning each quick-lock fastener ¼ turn clockwise; making sure the fastener is completely locked. Omega Brackets can be installed into the fixture base as illustrated below.

CLAMP INSTALLATION

When mounting fixture to truss, be sure to secure an appropriately rated professional grade rigging clamp to the included **Omega Brackets** using an M12 screw fitted through the center hole of the **Omega Brackets**. The fixture provides built-in rigging points for a **SAFETY CABLE** (not included). Be sure to only use one of the designated rigging points for the safety cable and never secure a safety cable to a carrying handle.

INSTALLATION GUIDELINES

RIGGING

Overhead rigging requires extensive experience, including among others, calculating working load limits, installation material being used, and periodic safety inspection of all installation material and the fixture. If you lack these qualifications, do not attempt the installation yourself. Improper installation can result in bodily injury.

This fixture is designed to be mounted vertically (hanging or upright), or horizontally (perpendicular to vertical axis) only.

DMX SETUP

DMX-512: DMX is short for Digital Multiplex. This is a universal protocol used as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions from the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals located on all DMX fixtures (most controllers only have a DATA “OUT” terminal).

DMX Linking: DMX is a language allowing all makes and models of different manufactures to be linked together and operate from a single controller, as long as all fixtures and the controller are DMX compliant. To ensure proper DMX data transmission, when using several DMX fixtures try to use the shortest cable path possible. The order in which fixtures are connected in a DMX line does not influence the DMX addressing. For example; a fixture assigned a DMX address of 1 may be placed anywhere in a DMX line, at the beginning, at the end, or anywhere in the middle. When a fixture is assigned a DMX address of 1, the DMX controller knows to send DATA assigned to address 1 to that unit, no matter where it is located in the DMX chain.

Data Cable (DMX Cable) Requirements (For DMX Operation): The Focus Flex can be controlled via DMX-512 protocol. Your unit and your DMX controller requires a 5-pin XLR connector for data input/output. We recommend Accu-Cable DMX cables. If you are making your own cables, be sure to use standard 110-120 Ohm shielded cable (This cable may be purchased at almost all pro lighting stores). Your cables should be made with a male and female XLR connector on either end of the cable. Also remember that DMX cable must be daisy chained and cannot be split.

Notice: Be sure to follow figures two and three when making your own cables. Do not use the ground lug on the XLR connector. Do not connect the cable’s shield conductor to the ground lug or allow the shield conductor to come in contact with the XLR’s outer casing. Grounding the shield could cause a short circuit and erratic behavior.

3-Pin XLR to 5-Pin XLR Conversion		
Ground/Shield	Pin 1	Pin 1
Data Compliment (- signal)	Pin 2	Pin 2
Data True (+ signal)	Pin 3	Pin 3
Not Used		Do Not Use
Not Used		Do Not Use

A DMX512 terminator reduces signal errors, avoiding most signal reflection interference. Connect PIN 2 (DMX-) and PIN 3 (DMX+) of the last fixture in series with a 120 Ohm, 1/4 W Resistor to terminate the DMX512.

Special Note: Line Termination. When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behavior. A terminator is a 110-120 ohm 1/4 watt resistor which is connected between pins 2 and 3 of a male XLR connector (DATA + and DATA -). This unit is inserted in the female XLR connector of the last unit in your daisy chain to terminate the line. Using a cable terminator (ADJ part number Z-DMX/T) will decrease the possibilities of erratic behavior.

DMX ADDRESSING

All fixtures should be given a DMX starting address when using a DMX controller, so the correct fixture responds to the correct control signal. This digital starting address is the channel number from which the fixture starts to “listen” to the digital control signal sent out from the DMX controller. The assignment of this starting DMX address is achieved by setting the correct DMX address on the digital control display on the fixture.

You can set the same starting address for all fixtures or a group of fixtures, or set different addresses for each individual fixture. Setting all fixtures to the same DMX address will cause all fixtures to react in the same way, in other words, changing the settings of one channel will affect all the fixtures simultaneously.

If you set each fixture to a different DMX address, each unit will start to “listen” to the channel number you have set, based on the quantity of DMX channels of each fixture. That means changing the settings of one channel will only affect the selected fixture.

In the case of the Vizi Wash Z37, when in 14 Channel Mode, you should set the starting DMX address of the first unit to 1, the second unit to 15 (14 + 1), the third unit to 29 (15 + 14), and so on.

Channel Mode	Unit 1 Address	Unit 2 Address	Unit 3 Address	Unit 4 Address
14 Channels	1	15	29	43
15 Channels	1	16	31	46
17 Channels	1	18	35	52
18 Channels	1	19	37	55
19 Channels	1	20	39	58
38 Channels	1	39	77	115
39 Channels	1	40	79	118
72 Channels	1	73	145	217
73 Channels	1	74	147	220

SYSTEM MENU

The fixture includes an easy to navigate system menu control panel display where all necessary settings and adjustments are made. (See image below) During normal operation, pressing the **MENU** button once will access the fixture's main menu. Once in the main menu, you can navigate through the different functions and access the sub-menus with the **UP** and **DOWN** buttons. When you reach a field that requires adjusting, press the **ENTER** button to access that field and use the **UP** and **DOWN** buttons to adjust the field. Pressing the **ENTER** button once more will confirm your setting. You may exit the main menu at any time without making any adjustments by pressing the **MENU** button.

SYSTEM MENU

ADJ VIZI WASH Z37 - SYSTEM MENU				
Default setting shown in bold				
MAIN MENU	OPTIONS / VALUES (Default Settings in BOLD)		DESCRIPTION	
DMX Settings	DMX Address	001 - 512	Shall be used to set the units starting DMX address channel. Depending on set DMX mode, unit shall not allow to be addressed any higher that will not allow for all channels to be accessed from the console.	
	DMX Channel Mode	14ch, 15ch, 17ch , 18ch, 19ch, 38ch, 39ch, 72ch, 73ch	Shall be used to set the units desired DMX mode.	
	No DMX Status	Hold Last		Shall be used to set the units behavior when DMX signal is not present. Hold shall be the default setting and unit shall hold all last channel values received from the console when signal is lost.
		Blackout		Blackout option shall take all channels to zero (0) when signal is lost.

		Tilt Invert	ON / OFF	
		P./T. Feedback	ON / OFF	
		P./T. Speed	Speed 1 , Speed 2	Speed 1 (Default) should allow unit to move at its fastest possible speed without losing step. Speed 2 should be for more smooth precise movements so naturally this would be slower movements compared to Speed 1
		Hibernation	OFF , 01M~99M, 15M	When DMX signal is not present for the set time, the unit shall go into standby mode after the set time. When set to OFF, unit shall never go into hibernation mode. The unit should have 01M to 99M options... so 01M, 02M, 03M... 99M (M=Minutes). 15M should be default.
	Fan Settings	Head	Auto , High, Silent	
		Base	Auto , High, Silent	
	Dim Modes		Standard , Stage, TV, Architectural, Theatre, Stage 2	Preset dim modes... see Dim Modes Tab for details.
		Dim Speed	0.1S~10S	Set your own dim delay versus smooth dimming. 0.1s is the least delay, and 10s is the most delay.
	Dim Curve		Square Law , Linear, Inv SQ Law, S.Curve	
	Reset Motors	Reset All Motors	YES / NO	
		Pan/Tilt Reset	YES / NO	
		Zoom Reset	YES / NO	
Display	Intensity	1-10		
	Display Invert	YES / NO		
	Screen Saver Delay	OFF - 10 minutes		
	Lock On/Off	ON / OFF

SYSTEM MENU

DMX Settings

Select **DMX Settings**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **DMX Address**, **DMX Channel Mode**, or **No DMX Status**.

DMX Address — DMX512 address setting

Select **DMX Address**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to adjust the address from **001** to **512**, then press the **ENTER** button to store. Press the **MENU** button back to the last menu or let the unit idle one minute to exit menu mode.

DMX CH Mode — channel mode

Select **DMX CH Mode**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select 14ch, 15ch, 17ch, 18ch, 19ch, 38ch, 39ch, 72ch, and 73ch, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

No DMX Status — fixture state while DMX single stops

Select **No DMX Status**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Hold Last** (fixture continues to obey the last command it received Via DMX if DMX signal stops), **Blackout** (fixture blacks out if DMX signal stops), **Int Program**, or **Manual** (fixture take all channels to the last set Manual channel settings if DMX signal stops), then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode (In the state of **Blackout/ Hold Last**, when there is no DMX signal, the unit will remain in the final state within 15M, after which it will enter the static mode. The unit will remain in the final state within 15M. After 15M, it will enter the static mode. At this time, the lamp will turn off, and the motor will stop working. When the DMX signal is reconnected, the unit will be automatically activated and reset).

Personality

Select **Personality**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Status Settings**, **Fan Settings**, **Dim Modes**, **Dim Curve**, **Reset Motors**, **Display**, or **Service**.

Status Settings

Select **Status Settings**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Pan Invert**, **Tilt Invert**, **P./T. Feedback**, **P./T. Speed**, or **Hibernation**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Pan Inverse

Select **Pan Inverse**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **ON** (normal) or **OFF** (pan inverse), then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Tilt Invert

Select **Tilt Invert**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **ON** (normal) or **OFF** (pan inverse), then press the **ENTER** button to store. Press the **MENU** button back to the last menu, or let the unit idle one minute to exit menu mode.

P./T. Feedback

Select **P./T. Feedback**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **ON** (normal) or **OFF** (pan inverse), then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

P./T. Speed

Select **P./T. Speed**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Speed 1** or **Speed 2**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

SYSTEM MENU

Personality (continued)

Hibernation

Select **Hibernation**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **OFF** (unit will never go into hibernation mode), **01M~99M** (Hibernation mode), or **15M** (default mode), then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Fan Settings

Select **Fan Settings**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Head** or **Base**, then press the **ENTER** button to store. Press the **MENU** button back to the last menu, or let the unit idle one minute to exit menu mode.

Head

Select **Head**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Auto**, **High**, or **Silent**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Base

Select **Base**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Auto**, **High** or **Silent**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Dim Modes

Select **Dim Modes**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Standard**, **Stage**, **TV**, **Architectural**, **Theatre**, **Stage 2**, or **Dim Speed**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Dim Curve

Select **Dim Curve**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Square Law**, **Linear**, **Inv SQ Law**, or **S Curve**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Reset Motors

Select **Reset Motors**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Reset All Motors**, **Pan/Tilt Reset**, **Zoom Reset**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Reset All Motors

Select **Reset All Motors**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Yes** or **No**, press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Pan/Tilt Reset

Select **Pan/Tilt Reset**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Yes** or **No**, press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Zoom Reset

Select **Zoom Reset**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Yes** or **No**, press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Display

Select **Display**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Intensity**, **Display Invert**, **Screen Saver Delay**, or **Lock On/Off**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

SYSTEM MENU

Personality (continued)

Service

Select **Service**, then press the **ENTER** button to confirm; the present mode will show on the display. Press the **MENU** button to exit. Use the **UP/DOWN** button to select **Calibration**, **USB Port Power**, **Update Software**, or **Factory Restore**.

Calibration

Select **Calibration**, then use the **UP/DOWN** buttons to select **Pan**, **Tilt**, **Zoom**; with any selection, use the **UP/DOWN** button to adjust the value from -128 to 127; then use the **UP/DOWN** button to select **Red**, **Green**, **Blue**, **White**, **Red1**, **Green1**, **Blue1**, **White1**, ..., **Red11**, **Green11**, **Blue11**, **White11**, then use the **UP/DOWN** button to adjust the value 125 to 255.

USB Port Power

Select **USB Port Power**, then use the **UP/DOWN** button to select **On** or **Off**. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Update Software

When selecting **Update Software**, the present mode will show on the display. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Factory Restore

Select **Factory Restore**, then use the **UP/DOWN** button to select **Yes** or **No**. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Manual Control

Select **Manual Control**, then press the **ENTER** button to confirm. The present channel will show on the display. Use the **UP/DOWN** button to select **Pan**, **Pan Fine**, **Tilt**, **Tilt Fine**, **Red1-11**, **Green1-11**, **Blue1-11**, **White1-11**, **Color Macros**, **Base Color**, **Block Macro**, **Shutter**, **Dimmer**, **Dimmer Fine**, **Zoom**, **Zoom Fine**, **Macro Speed**, or **P/T Speed**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to adjust the value 000 to 255, then press the **ENTER** button to store. The fixture will run as the channel value indicates. Press the **MENU** button to move back to the last menu, or exit menu mode idling one minute. Note that all channel values default to 0 after exiting Manual Test menu.

Internal Programs

Select **Internal Programs**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Program 0**, **Program 1**, **Program 2**, **Program 3**, or **Program 4**.

Program 0

Select **Program 0**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Speed** or **Fade**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Program 1

Select **Program 1**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Speed** or **Fade**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Program 2

Select **Program 2**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Speed** or **Fade**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

SYSTEM MENU

Internal Programs (continued)

Program 3

Select **Program 2**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Speed** or **Fade**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Program 4

Select **Program 4**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Speed** or **Fade**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Target Mode

Select **Target Mode**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Mode 0**, **Mode 1**, **Mode 2**, **Mode 3**, or **Mode 4**.

Mode 0

Select **Mode 0**, then press the **ENTER** button to confirm. With this selection, the Pan movement range is 540°, and the Tilt movement range is 270° (see Target Modes on page 27). Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Mode 1

Select **Mode 0**, then press the **ENTER** button to confirm. With this selection, the Pan movement range is 90°, and the Tilt movement range is 135° (see Target Modes on page 27). Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Mode 2

Select **Mode 2**, then press the **ENTER** button to confirm. With this selection, the Pan movement range is 90°, and the Tilt movement range is 135° (see Target Modes on page 27). Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Mode 3

Select **Mode 3**, then press the **ENTER** button to confirm. With this selection, the Pan movement range is 90°, and the Tilt movement range is 135° (see Target Modes on page 27). Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Mode 4

Select **Mode 4**, then press the **ENTER** button to confirm. With this selection, the Pan movement range is 90°, and the Tilt movement range is 135° (see Target Modes on page 27). Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Information

Select **Information**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Fixture Life Time**, **Total LED Time**, **Fixture Temps**, **Fan Info**, **DMX Values**, **Error Logs**, **Max Temp LED ON**, **High Temp LED OF**, or **Software Version**.

Fixture Life Time

Select **Fixture Life Time**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Power On Time**, **P-On Time-R**, or **P-On Time Reset**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Total LED Time

Select **Total LED Time**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **LED on Time**, **LED On Time-R**, or **LED On Time Reset**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle on minute to exit menu mode.

SYSTEM MENU

Information (continued)

Fixture Temps

Select **Fixture Temps**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **LEDs**, or **Reset LED Temp**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Fan Info.(RPM)

Select **Fan Info.(RPM)**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **LED Fan1**, **LED Fan2**, **LED Fan3**, **Head Fan**, **Base Fan1**, or **Base Fan2**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

DMX Value

Select **DMX Value**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Pan**, **Tilt**, ..., **Special Function**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Error Logs

Select **Error Logs**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **Fixture Errors**, or **Reset Error Log**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Max Temp LED ON

Select **Max Temp LED ON**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **32~169°F**, **102°F / 0~76°C**, **39°C**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

High Temp LED OFF

Select **High Temp LED OFF**, then press the **ENTER** button to confirm. Use the **UP/DOWN** button to select **170°F**, **100°F / 77°C**, **38°C**, then press the **ENTER** button to store. Press the **MENU** button to move back to the last menu, or let the unit idle one minute to exit menu mode.

Software Version

Select **Software Version**, then press the **ENTER** button to confirm, present mode will show on the display. Press the **MENU** button to exit.

RGBW LIGHTING PARTITION

COLOR BLOCKS AND RINGS LAYOUT

Block Layout (72Ch/73Ch)

Ring Layout (38Ch/39Ch)

1. When the Pan motor is on the left side, and the Tilt motor is on the right side, the sequence of RGBW lights is shown in the above left "Block Layout" figure (72 Channel & 73 Channel).
2. When the Tilt motor is on the left side, and the Pan motor is on the right side, the sequence of RGBW lights is shown in the above right "Ring Layout" figure (38 Channel & 39 Channel).
3. 1~11 in the Block Layout figure represents the lighting partition situation when setting from the Red1 channel to the White11 channel of 58 Channel (The 14/15/17/18/19 channels have no partition, and is fully monochrome light). For example: when setting from the Red2 to the White2, the Lighting area is the area2 shown in the 'Block Layout' figure.
4. Ensure the position of the X-axis motor/Y-axis motor. If the sequence of the Lighting area is not in accordance with the figures above, double-check the the wiring harness installation.

SPECIFICATIONS

Light Source:

- 37x 20W RGBW (4-IN-1 - Red, Green Blue & White) Osram LEDs
- 20,000 Hour Average LED Life
- LUX @ 5M: 15000 lux @ 10-degrees; 1100 lux @ 60-degrees

Effects:

- 11-zone Ring Control with Color Macros
- Variable Strobe & Pulse effects

Connections:

- Locking power In/Out to daisy chain power
- 3-pin and 5-pin DMX connections for data linking
- RDM (Remote Device Management)
- USB Input for Updating Fixture Firmware

Control:

- Motorized Linear Zoom: 10 ~ 60-degrees
- 4-button Touch Control Panel with Large LED Screen
- Control: DMX-512 & RDM (Remote Device Management)
- Multiple DMX Channel Modes
- Dim Modes: 6 Presets (Standard, Stage, TV, Architectural, Theatre & Stage 2)
- Dim Curves: 4 Presets (Square, Linear, Inv. Square, S. Curve)
- Dim Speed control (0.1~10 Seconds)
- Dimming: 0 - 100%
- Strobe & pulse control
- Various Strobe speeds (1-40Hz)
- 16-bit fine zoom control
- 16-bit fine pan control
- 16-bit fine tilt control
- Color display with touch button on two sides
- With Wired Digital Communication Network

Electrical:

- Input Voltage: 100-240V 50Hz/60Hz (Auto Sensing)
- Power Draw: 525W, 4.375A @ 120V or 700W 3A @ 230V

Dimensions/Weight:

- Dimensions (LxWxH): 16.1" x8.9" x 20.5" / 408.4x226x520.3mm
- Weight: 40 lbs. / 18 kg.

Included in box:

- Locking power cord
- Two (2) Omega brackets for truss mounting

Ratings / Approval

- cETLus Approved (Control # 4000358)

Specifications and documentation subject to change without notice.

DIMENSIONS

*DRAWINGS NOT TO SCALE. DIMENSIONS FOR INFORMATION ONLY AND SUBJECT TO CHANGE WITHOUT NOTICE.

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RADIO FREQUENCY INTERFERENCE WARNINGS & INSTRUCTIONS

This product has been tested and found to comply with the limits as per Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device uses and can radiate radio frequency energy and, if not installed and used in accordance with the included instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following methods:

- Reorient or relocate the device.
- Increase the separation between the device and the receiver.
- Connect the device to an electrical outlet on a circuit different from which the radio receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Energy Saving Matters (EuP 2009/125/EC)

Saving electric energy is a key to help protecting the environment. Please turn off all electrical products when they are not in use. To avoid power consumption in idle mode, disconnect all electrical equipment from power when not in use. Thank you!
