## Description

The Thunder-KS1 I is a compact active subwoofer featuring a 12" cone driver and a powerful 4x 1500W @ 4Ω audio amplifier module with built-in DSP.

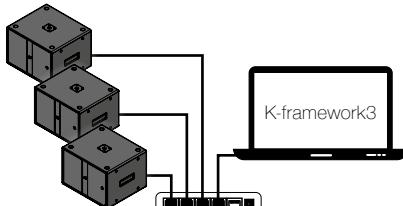

The audio power output connectors allow the Thunder subwoofers to drive a wide range of K-array passive loudspeakers. Compatible with midrange loudspeaker and other passive subwoofers, the self powered Thunder subwoofers with DSP are designed to be the core devices in K-array sound reinforcement systems.

The dedicated K-array Connect mobile app provides a user friendly interface for remote control of the DSP main parameters and easy configuration of the signal routing.

- 12" neodimium magnet woofer.
- Built in Class D audio amplifier module 4x 1500W @ 4Ω.
- 4x 1500W @ 4Ω audio power outputs for driving external loudspeakers.
- K-array Connect mobile app for easy wireless access to the DSP features.
- K-framework designer and remote control software for advanced loudspeakers system management.
- DSP onboard with:
  - Channel Grouping: group controls over multiple channels;
  - Input EQ: 3 bands fully parametric equalizer;
  - Output EQ: 8 bands fully parametric selectable filters: Peaking, High-Shelf, Low-Shelf, High-Pass, Low-Pass, HP-Butterworth, LP-Butterworth;
  - Dynamic limiters;
  - Signal routing: freely assignable input-to-output signal path with level adjustment;
  - Channel delay up to 230ms.
- osKар embedded: custom operating system running on quad core 1.5 GHz internal processor.
- Bass reflex acoustic load with symmetric ports.
- High density Finnish birch plywood cabinet for increased resistance and robustness.
- Rugged Polyurea coating for improved environmental resistance.
- Available in black or white or customizable paint over the entire RAL palette.

K-framework3 is the managing and control software dedicated to professionals and operators looking for a powerful tool for designing and managing a large number of units over a wired LAN in demanding applications.
