

S 12

BASS REFLEX SUBWOOFER

DESCRIPTION

S 12 is a high power, compact subwoofer system ideal for those installations where the physically small size and impact of a 12" driver are desired. Extending the frequency response of these systems to below 40Hz this highly efficient design is capable of providing output levels normally associated with considerably larger enclosures.

A system suited to background music playback in applications ranging from clubs, bars and cafes, right through to theatres and AV presentations. The low-frequency transducer is a 12" woofer with a 2,5" voice coil. Woofer design is the result of the latest refinements in RCF experiences in compact active and passive subwoofer design, resulting in a fast and controlled reproduction of the bass frequency range. It is particularly well-suited in high-quality multimedia applications.
